Kursbeskrivning

“Counter technique is a movement system developed to help the dancer think about the dancing body, focusing on the process of incorporating information into action. Within a clear structure of exercises the Counter technique class enables dancers to move big and fluidly, while becoming strong and flexible at the same time. Dancers are encouraged to be proactive in discovering connections and solutions, to be less concerned with judging themselves and to work in a healthy and sustainable way.

In this workshop you will be introduced to principles and tools of the Countertechnique through a Countertechnique class.

The class starts with a recurring set of tasks and exercises, allowing dancers to investigate the Countertechnique principle in detail.

The second half of the class consists of changing components, working towards a flowing movement combination, where you will get to work more in depth with several of the tools through movement explorations, task work and awareness games and set repertoire material. We will also experience the tools through the exchange in partnering situations. Opening up to the information that is transferred through different channels when in communication with another person.”
