MÖTE MED CORINNE LASALLE

Approach in the closer for an organic discovery of the body,
Work around the energy of the movement to extract from it from new substances.
A dance where alternation of falls, tensions, relaxations, imbalance, ecstasy and jubilation of
a suspension give way

The preparation is body based on listening to expand its own sphere of operation. Awaken
the body and sensory capabilities of each. Development of a variation based awareness of
the center of gravity and its deployment to the outside.

Corinnes class is unique! Very physical, yet with a poetic flow.

Corinne Lanselle is originally from Paris, but was educated in New York with influences from Horton and Limon. Since 1985 she has created her own work within and for her own company. She is a well-known dance teacher all around the world.

She is teaching regularly at festivals in Italy, Japan and France. She is a member of the faculty and teaches regularly at Studio Harmonics professional school in Paris.
