

MUSICALITY, DYNAMICS AND TIME

9 - 12 dec 2024

The workshop will focus on musicality, dynamics and the relationship between movement and time.

By using different dynamic qualities, engaging different ways of listening to our own movement and to the movement around us, and by playing with the perception of time, we will aim to open a space where the connection between movement and time is at the foreground.
Within a frame of specific and precise physical scores the participants will have the freedom to find their own interpretation and playfulness and to use the proposition in order to enrich their own dancing.
